Outstanding Quality

With over 40 years' expertise in sourcing and distributing quality fasteners across the aerospace industry, BFC are well placed to support your business needs. Working directly with sourcing partners in the United States, all of our fasteners are fully-traceable, made to AS9120 standards.

We maintain strict engineered levels by following stringent quality standards, meaning that our fastener products are engineered to meet customer requirements.

In-house inspection

All BFC Aerospace fasteners are inspected to meet the required industry standards, and as such we only purchase from AS9100 certified manufacturers.

Aerospace Standards

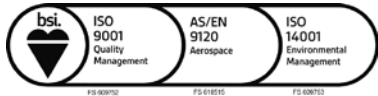

All BFC Aerospace fasteners adhere to the relevant aerospace standards from "Factory New" sources.
